

Established in Sydney by Mr Robert Adcock, KingGee has been part of Australian history since 1926. The original KingGee overall was born out of humble beginnings and was the first in a long line of work garments known for their quality and careful craftsmanship.

Over the years, KingGee have evolved with the changing needs of the work environment. Today, our passion and expertise are second to none. Our premium products are engineered to ensure comfort, durability and functionality enabling you to work at your best in all conditions. We lead the industrial workwear industry and push the boundaries of garment development to new levels. Workcool Hyperfreeze and the new Tradies Utility Range are just two of our latest innovations.

We have come a long way since our first KingGee overall. One thing has never changed – our pride and care is still seen today in our products and in our people.

THE KINGGEE WORKINGS

AIRFLOW

Engineered ventilation placed in high heat zones to allow air to flow through to the body, improving breathability and keeping the wearer cool and comfortable.

MOISTURE MANAGEMENT

Fabrics designed to keep you dry and comfortable: moisture wicking, quick drying and breathable.

WATER RESISTANT

Garments constructed using highly water resistant fabrics. Not waterproof due to garment seams not being sealed.

ANTIMICROBIAL

Antimicrobial finish has been applied to the fabric to minimise odours and inhibit the growth of bacteria, Keeping you smelling fresher for longer!

RIPSTOP FABRIC

Ripstop fabrics have been woven to be highly tear and rip resistant.

WATERPROOF

Garments constructed with waterproof fabrics and have been seam sealed to prevent water penetrating the inside of the garment.

ARTICULATED FIT

Engineered to fit and move with you.

REFLECTEC

Material that uses millions of reflective glass beads to reflect light back towards its original source for increased visibility and safety in low light situations.

WIND RESISTANT

Garments constructed using highly wind resistant fabrics. Not windproof due to garment seams not being sealed.

DURABLE WATER REPELLENT

Durable water repellent finish sheds water from the garments surface.

REINFORCED

Extra reinforcement fabric has been added to the garment at critical areas for durability.

WINDPROOF

Garments constructed with fabric that has a windproof membrane and have been seam sealed to prevent wind penetrating the inside of the garment.

HIGH VISIBILITY

This symbol indicates which garments have been designed to comply with AS/NZS 4602.1:2011. These garments give you confidence that you will be visible at work. See page 50 for more information.

STRETCH

Built-in stretch providing comfort and freedom of movement

WRINKLE RESISTANT

Durable fabric finish that reduces the garments tendency to crease, making it easy to care for.

LIGHTWEIGHT

Lightweight fabrics that do not compromise strength or durability.

TECHNOTEX

Water, oil and soil repellent finish, helping you stay dry and clean and keeps fabrics and colours looking new for longer.

KNEE PAD POCKETS

Provision to hold knee pads in place.

UPF RATING

An Ultraviolet Protection Factor (UPF) rating for Ultraviolet Radiation transmitted through a fabric onto the skin. Look for garments with a UPF 50+ rating to be assured of excellent protection. These garments have been designed to comply with AS/NZS 4399:1996.

WORKCOOL HYPER FREEZE

COOLING TECHNOLOGY

**WORKCOOL HYPERFREEZE
IS A MARKET LEADING COOLING INNOVATION
THAT HARNESSES YOUR BODY'S SWEAT TO LOWER
THE TEMPERATURE OF THE FABRIC AND KEEP YOU COOL.**

COOLING PROPERTIES

Cooling is achieved through the use of Xylitol, the same substance used in mint confectionery.

WICKING PROPERTIES

Fabric finish wicks moisture away from the skin to keep you dry and comfortable.

- Fabric cooling
- Moisture wicking
- Quick drying
- 100% Polyester for easy care / colour fastness / brightness in hi-vis colouration
- Durable fabric finish
- Infrared blocking aids cooling

COOL, NOW ICE COLD

SIZE GUIDE

MEN'S MEASUREMENTS STANDARDS

A / NECK

Measure around your neck at the collar level. Remember to make allowance for comfort (usually 2 fingers behind the tape).

B / CHEST

It is important to stand naturally, keeping the tape level and straight. A firm (not tight) chest measurement should be taken.

C / WAIST

Measure around natural waistline, keeping the tape level and straight. Do not measure over trousers.

D / INSIDE LEG

Take the measurement from the crotch to the top of the heel of the shoe.

WOMEN'S MEASUREMENTS STANDARDS

A / BUST

Measure around the body across the fullest part of the bust, keeping the tape level and straight.

B / NATURAL WAIST

Measure around the smallest part or your natural waistline, keeping the tape level and straight. Do not measure over trousers.

C / LOW WAIST

Measure at a level approximately 4cm down from the natural waistline, keeping the tape level and straight. Do not measure over trousers.

D / HIPS

Measure around the widest part of your hips (approximately 20-30 cm below the waist). In this position the tape measure should slide up, down and over the bottom.

HIGH VISIBILITY GUIDE

KingGee high visibility workwear meets or exceeds Australian and New Zealand Standards AS/NZS 4602.1:2011.

According to the Australian Standards, materials classified as high visibility for daytime use must be manufactured from a durable fabric of woven or knitted cotton or equivalent man-made fibre that contains a fluorescent pigment or other high visibility dye, or to which a fluorescent plastic coating has been applied. These materials are subjected to the following tests and must meet or exceed specified minimum requirements for:

- Daylight colour and luminance factor
- Colour fastness to light
- Colour fastness to washing
- Colour fastness to perspiration
- Colour retention testing

In some cases, for safety reasons, a garment must be made from a natural fibre incapable of retaining a fluorescent colour. In these instances, the material is tested for luminance for non-fluorescent materials. Alternatively, man-made fibres are generally capable of retaining a fluorescent colour and are therefore tested for luminance for fluorescent materials. The fabrics used in the manufacture of KingGee high visibility workwear are tested and must meet or exceed specified minimum requirements for:

- Chromaticity
- Luminance for fluorescent materials
- Luminance for non-fluorescent materials

Things to know about high visibility standards:

- Class D means the garments meets AS/NZS 4602.1:2011 for daytime use only.
- Class N means the garments meets AS/NZS 4602.1:2011 for night time use only.
- Class D/N means the garments meets AS/NZS 4602.1:2011 for day or night time use.
- Bottoms (pants and shorts) are not part of the high visibility standards and therefore do not comply with AS/NZS 4602.1:2011.

IMPORTANT: LIMITATIONS OF USE.

Under no circumstances should Class D garments be worn for visibility purposes at night. Any markings, attachments, screen prints or other alterations, accessories or coverings not incorporated into the original product may not only void the garment compliance with the appropriate standard, they may also put the user at risk by reducing the high visibility performance of the garment. The high visibility properties offered by KingGee high visibility may be lessened due to normal wear over time or if the fabric is stretched. KingGee high visibility garments using natural fibres have been tested and comply to Australian Standards AS/NZS 4602.1:2011 in dry conditions. Wet conditions may alter the compliance of these fabrics to the standard and appropriate care should be taken.

UPF RATINGS

Garments are classified based on the ultraviolet protection factor (UPF). The UV protection of fabric depends on the content, weave, density and colour. A UPF rating is an indication of the length of time a garment will protect the average skin from turning red when subject to maximum intensity UV radiation.

For example, a garment with a UPF 24 will provide 240 minutes pre/redness times the average skin's unprotected pre/redness time of 10 minutes. Most garments in this catalogue have a UPF rating provided next to the product descriptions.

For garments that do not show a UPF rating please refer to the table on the next page as a guide. UPF fabric tests have been conducted in accordance with Australian and NZ Standards AS/NZ 4399:1996.

The UPF rating is for the fabric and does not address the amount of protection which is afforded by the design of the article. The manipulation involved in garment manufacture such as stretching and sewing may lower the UPF of the material. Articles which have been designed to cover the maximum area of the body are recommended.

The protection offered by garments may be lessened:

1. at points where the fabric is in close contact with the skin such as across the shoulders;
2. if the fabric is stretched;
3. if the fabric is wet; and
4. with time, due to the effects of normal wear. Fabric has been rated in accordance to AS/NZ 4399:1996.

UVR PROTECTION	UPF RATINGS
Good Protection	15, 20
Very Good Protection	25, 30, 35
Excellent Protection	40, 45, 50, 50+

OUR QUALITY POLICY

We understand work can be demanding and stressing at times. KingGee garments are designed to facilitate your everyday.

Our quality department spends a lot of effort to make sure KingGee products are comfortable, functional and presentable for as long as possible.

- All fabrics from each purchase order is systematically tested by a third party laboratory for tear force, breaking force and colour fastness.
- All shades are carefully controlled in a light box to ensure the consistency of your uniforms
- All new products introduced in the market place are wear tested with real workers prior to the launch.
- All marketing claims are systematically tested and part of the product specifications.

Our quality department investigates any quality issue to understand its cause and continually raise the bar. Quality is paramount in KingGee and we will never sacrifice it. KingGee products comply with:

- Industrial Clothing Australian Standard Compliant AS2919-1987
- High Visibility Australian Standard Compliant AS/NZS 1906.4 & AS/NZS 4602.1:2011
- UPF Australian Standard AS/NZS 4399
- Boots-Safety Footwear Standard AS/NZS 2210.3C & AS/NZS 2210.3:2009

KINGGEE ACHIEVES THE HIGHEST WORKPLACE STANDARDS:

Australian Standards Compliance AS/NZS ISO 9001:2008 Quality Management System

AS/NZS ISO 9001
Certified

Davis Langdon Certification Services

ISO 9001 – QUALITY MANAGEMENT SYSTEMS

- ISO 9001 is the internationally recognised standard for the quality management of businesses.
- A quality management system in accordance with ISO 9001:2008 will provide to an organization with a set of processes that ensure a common sense approach to the management of the organization. The system should ensure consistency and improvement of working practices, which in turn should provide products and services that meet customer's requirements.

ETHICAL BUSINESS PRACTICES

KingGee is committed to a fair go for all and we actively manage our business and suppliers to ensure that textile workers are not exploited.

We adhere to the Homeworkers Code of Practice in Australia and the Code of Practice for Overseas Manufacturers and Suppliers. These Codes cover labour, wages, work and safety standards for KingGee products that are produced both locally and beyond our home shores.

WORKWEAR GROUP

WORKWEAR ONLINE

The Workwear Group offers flexible electronic ordering solutions for our customers.

Workwear Online offers you 24 hour access to manage your account. It is a quick and simple way to order your workwear online. Our e-trading solutions are security enabled, offer flexible payment methods, track and trace, available stock visibility, order status and history, invoice and credit copy downloads, catalogue downloads, customisation of ranges/favourites and more.

For online ordering, simply request secure access to www.workweargrouponline.com.au via your Account Manager/Sales Representative.

PLACING ORDERS

- 1 Log in to www.workweargrouponline.com.au
- 2 Browse products by selecting the KingGee catalogue or by entering the style name/product number in the "Product Search" field.
- 3 Select the product by clicking on the name or image of your choice.
- 4 Enter the quantity in the desired size/colour box.
- 5 Add the selected products to your shopping cart by clicking "Add to Cart" at the bottom right corner of the screen.
- 6 To add more products, repeat steps 1-5.
- 7 When you have finished filling your Shopping Cart, place the order with KingGee by following 3 quick steps:
 - a. Go to Cart/Checkout
 - b. Review your items and click on "Checkout" where your own order reference number can be added at this stage
 - c. Click "Place Order" (an email will be sent to your registered email address as confirmation of your order)

For further assistance, please contact your Sales Representative or contact our Customer Service on 1800 644 517.

NOTES

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

FOOTWEAR

KINGGEE FOOTWEAR

1. Genuine 10 gauge YKK® coil zipper, holds up in harsh environments
2. Memory Foam Footbed, moulds to the shape of the foot and a Poron™ heel pod
3. Anti-Static properties designed to reduce the risk of static build-up
4. Wide profile steel toe cap tested to 200 Joule impact
5. TPU Toe Bumper for added durability

APODC ENDORSED

KingGee Footwear and APODC are working together to deliver improved comfort and foot health for all of our end users. Footwear showing this logo have been tried, tested and recommended by experts.

30 DAY COMFORT GUARANTEE

30 DAY COMFORT GUARANTEE

Our Workboots have been engineered to provide maximum comfort. After careful study of the Australian foot anatomy we have designed KingGee boots with a wider last, sole & toe cap. We are so confident you will love these boots that they come with a 30 day comfort guarantee.

BUILT TO FIT FOOTWEAR

APDDC ENDORSED

KingGee Footwear and APDDC are working together to deliver improved comfort and foot health for all of our end users. Footwear showing this logo have been tried, tested and recommended by experts.

COMPOSITE TOE CAP

Composite safety toe caps provide the same level of protection as that afforded by steel toe caps tested under AS/NZS 2210.3:2009 (200 Joules) standards, with the added benefit of being non-conductive and are up to 30% lighter than a steel toe cap.

MEMORY FOAM FOOTBED

Sensitive to pressure and moulds perfectly around the contours of your foot. The PU bottom layer provides permanent cushioning and shock absorption.

ACHILLES FLEX

Accordion-style flex point in the Achilles area allows the boot to flex. It's unique design allows the foot to flex forward when crouching and backward when changing gears in a car/truck preventing any pain and restriction in movement from the achilles tendon.

DUAL DENSITY PU/TPU OUTSOLE

Polyurethane (PU) provides an excellent balance of shock absorption (cushioning) and energy return (rebound). Thermoplastic Polyurethane (TPU) has many useful properties including elasticity and resistance to most oil, grease and abrasion, as well as 130 degree Celsius heat resistance.

MET GUARD

Poron™ XRD™ Extreme Impact Protection material is a breakthrough technology. Extreme impact protection from a moulded pad stretching from the tongue to the steel cap. Contoured, breathable and flexible allowing ease of motion for comfort & fit whilst protecting the metatarsal. Tested in accordance to ASTM F 2413-11

AIRPORT FRIENDLY

Airport friendly boots feature non-metallic components. Plastic shanks are used in manufacture together with the use of a composite safety cap ensure KingGee footwear meets AS/NZS 2210.3:2009 safety standards.

ELECTRICAL HAZARD EH

Electrical hazard footwear is specifically designed and tested to insulate the wearer from electrical hazards, to reduce the flow of electricity. EH Footwear has been tested to the requirements of ASTM F2413-11. EH shoes should not be used as the primary source of protection in an electrical hazard environment.

OIL AND ACID RESISTANT

Sole resistant to fuel oil and rated to SRA slip resistance which is tested using water on ceramic tile

ANTI-STATIC

Boots with Anti-Static properties are designed to reduce the build up of excess static electricity by conducting body charge to the ground. This offers a level of protection against ignition hazards such as flammable materials and gasses.

GENUINE LEATHER

KingGee boots are made using the finest quality leathers that mould to the shape of your feet allowing your feet to "breathe".

ORGANIC FAT AND OIL RESISTANT

Sole resistant to organic fats and oils

ARZ+™ PAD TECHNOLOGY

Anatomical Rebound Zone (ARZ+) with an expandable polymer that provides excellent cushioning and rebound. ARZ+ heel protection difference is apparent at heel strike the soft contouring material dissipates force upon impact.

LIGHTWEIGHT

KingGee footwear incorporate safety toe caps in a contemporary yet durable design which feels lightweight on the wearer's foot.

PROTECTIVE TPU TOE BUMPER

Protective Thermoplastic Polyurethane (TPU) toe and heel bumpers provide further abrasion resistance

RUBBER OUTSOLE

Rubber offers 300° Celsius (572°F) heat resistance. Rubber has excellent resistance to oils, acids and is naturally resistant to hydrolysis.

AGION®

Agion® branded antimicrobial technology makes products cleaner and longer lasting with silver, copper and zinc, which have been proven in use throughout history. Agion® anti-microbial technology provides built in protection by working 24/7 resisting the growth of microbes.

KEVLAR®

DuPont™ Kevlar® aramid fibre is used due it being lightweight, heat resistant and extraordinarily strong, with 5 times the strength of steel on an equal-weight basis. It is about 2 1/2 times stronger than nylon and polyester, has almost no stretch, does not melt, and decomposes at 800°F.

STEEL CAP

Designed to withstand a force of 200J (Joules) and compression resistance of 1.5 ton. Ethylene Vinyl Acetate (EVA) protective cap liner for added comfort and steel cap protective liner to ensure toes are comfortable and not in contact with the protective safety cap.

BOA®

A closure system of steel Lace, nylon guides and a mechanical reel. Improved level of comfort along with durability, light weight, fast and convenient operation, and on-the-fly adjustment.

OUTLAST®

Outlast® technology, originally developed for NASA, utilizes phase change materials (PCM) that absorb, store and release heat for optimal thermal comfort. Outlast® technology will proactively manage heat while controlling the production of moisture before it begins. That's the Outlast® difference.

SRC SLIP RESISTANCE

SRC offers the most superior slip resistance for all surfaces. (Tested on both ceramic tile floor with SLS solution and steel floor with glycerol).

BENCHMARK®

All KingGee footwear showing this logo is certified to AS/NZS 2210.3:2009 meeting all Benchmark® requirements under the Australian and New Zealand standards.

PORON™ XRD™

Extreme impact protection pad is durable, lightweight and comfortable. Poron™ XRD™ is designed to withstand multiple hits over time and not break down.

WATER RESISTANT

Water resistant footwear will repel water so that it soaks in more slowly and are best used when walking through dew or occasionally damp areas.

COSMO™

- Highly abrasion resistant lining
- Keeps you dry and comfortable
- Quick drying hi-tech

YKK®

World leader in the manufacture of fastening systems. YKK® Coil zipper is extremely strong and lightweight, has excellent heat resistance (up to 360°F/ 182°C) and resistance to cold (down to -60°F/ -51°C). Resistance to chemicals further extends the use of YKK® beyond the scope of conventional metal zippers.

WIDE SAFETY TOE CAP

Wide profile toe cap provides more comfort. All our footwear complies with Australian and New Zealand Standards AS/NZS 2210.3:2009

DRI-LEX® LINING

Dri-Lex® lining treated with Aegis® anti-microbial. A patented superior mesh designed to manage moisture within a boot environment.

- Wicks away moisture
- Allows your feet to breathe
- Keeps your feet dry
- Keeps your feet cool

30 DAY COMFORT GUARANTEE

Our Workboots have been engineered to provide maximum comfort. After careful study of the Australian foot anatomy we have designed KingGee boots with a wider last, sole & toe cap. We are so confident you will love these boots that they come with a 30 day comfort guarantee.

BUILT TO FIT SOLE UNIT

- 1 **WIDE STEEL TOE CAP**
For protection & comfort
- 2 **DRI-LEX™ LINING WITH AEGIS™ ANTI-MICROBIAL**
Keeps your feet cool and dry
- 3 **LIGHTWEIGHT SOFT PU**
For long-term comfort
- 4 **ARZ+™ TECHNOLOGY INCLUDING PORON™ XRD™ PAD**
Provides superior shock absorption
- 5 **RECYCLED WOVEN FABRIC**
For insulation
- 6 **PU MIDSOLE**
For maximum cushioning
- 7 **TPU OUTERSOLE**
Provides fuel oil, heat (up to 130°C) and slip resistance

BUILT TO FIT STORY

3D-SCANNING

A last gives the volume inside a boot and therefore is essential for comfort and fit. Ours has been designed by one of Australia's most experienced last-makers.

For over 35 years he has been measuring and recording Australian foot dimensions. The use of 3D scanning, his extensive database and expertise have all been instrumental in providing KingGee with a last that best fits the Australian foot.

DRI-LEX™ LINING

A superior mesh, designed to manage moisture within a boot environment. It keeps the foot surface dry and comfortable no matter the climate. The hydrophilic action in Dri-Lex™ fabrics works through a combination of absorption, wicking and rapid drying capabilities. This lining is also treated with Aegis™ anti-microbial to reduce odour formation caused by bacteria.

DRI-LEX®

BOOT SAFETY STANDARDS

AUSTRALIAN AND NEW ZEALAND SAFETY STANDARD – AS/NZS 2210.3:2009

Every safety boot sold in Australia has to pass the latest Australia and New Zealand Standards for protective and occupational footwear (currently AS/NZS 2210.3:2009).

Each style must be tested by an independent and authorised laboratory and then certified by a worldwide recognised organisation where each component of the boot is tested (fabric, sole, thread, lining, etc.).

BONDING TEST

Measures the force required to separate the upper from the sole unit or to separate different layers within the sole unit, i.e. separate midsole from outsole. Material tearing is part of the assessment when the force required to tear the material itself apart is lower than the bonding strength between two different materials and also lower than the bonding requirement then material failure will occur.

COMPRESSION TEST

This test measures the resistance of a toe cap being compressed by an upper plate with a pressing force 15kN = 1.5ton. The clearance between the toes and the toe cap must be over 12.5mm or 15mm depending on sizes.

IMPACT TEST

Each toe cap has to pass the impact resistance test explained in the standard AS/NZS 2210.3:2009. After the drop of a 20kg striker with a force of 200J, the clearance between your toes and the toe cap must be between 12.5mm to 15mm depending on sizes.

QUALITY LEATHERS

Our KingGee boots are made with attention to detail using the finest quality leathers that mould to the shape of your feet allows your feet to “breathe”.

Leather is a natural material that is made from animal hide that has been tanned. It is among the oldest of human inventions. In ancient times, the gatherers and hunters used leather as their protective clothing and for warmth.

KingGee cowhide leather is flexible, breathable and supple. Cowhide leather looks good dyed or left natural. It's durable, ages well and lasts up to five times longer than fabric. Its properties of toughness and tear and puncture resistance are the reason it is used in our boots. It naturally repels moisture, retains its shape, and resists sun and heat damage.

FULL-GRAIN LEATHER

KingGee full-grain leather workboots use cow hides which are not sanded or buffed, and are naturally tanned resulting in the hides having excellent breathability and a true softness in the leather.

Owing to the fact that this type of leather is not sanded, the natural marks on the hide are sometimes visible. Most people prefer this natural finish.

KingGee full-grain leather is very reliable and strong. This is because the grain has not been removed. Thus the fibre strength and the toughness of the hide are still retained in the leather. Full-grain leather does not wear out; instead a patina will be developed over time. Full-grain leather also has better breathability than other types of leather. Owing to the strength of this type of leather, it is used in the production of KingGee workboots.

SUEDE LEATHER

KingGee suede leathers are sanded to produce the velvet-soft feel that is typical of high-grade suede. This feel is achieved by sanding the inner layer of the cow hide.

Because it comes from a thinner piece of hide, suede is less durable than full-grain leather. The suede texture of the material also makes it more susceptible to damage from water and stains. However, because several pieces of suede can be produced from a single hide, it is less expensive than full-grain leather.

NUBUCK LEATHER

KingGee Nubuck leather has a soft, velvety surface and is the premium choice in leather. Nubuck is sanded on the outer surface of the leather, essentially the part that would have been the exterior skin of the animal.

Since the outside layer of a skin is much tougher, Nubuck lasts much longer than suedes and responds very well to this sanding process. It does show imperfections in the exterior layer of the skin much more easily, and is often treated with dyes, sometimes simply clear ones, to disguise any significant flaws.

Nubuck is subject to easy staining and often requires pre-treatment or stain-resistance protection to extend its life.

CRAZY HORSE LEATHER

Crazy Horse Leather is sometimes known as “saddle leather” and is treated with oil and wax in a unique tanning process to the surface of the leather. During this process, the oil and wax surface to create a rich, beautiful patina that's fade-resistant. When the leather is rubbed, the colour will change and will not immediately reverse, giving it an antique look.

HOW TO WORK OUT YOUR SHOE SIZE

MEN'S <small>EEE fit</small>																		
AUS/UK	5	5.5	6	6.5	7	7.5	8	8.5	9	9.5	10	10.5	11	12	13	14	15	16
USA	6	6.5	7	7.5	8	8.5	9	9.5	10	10.5	11	11.5	12	13	14	15	16	17
European	39	39.5	40	40.5	41	41.5	42	42.5	43	43.5	44	44.5	45	46	47	48	49	50

WOMEN'S <small>(For women's specific styles) D fit</small>														
AUS/USA	5	5.5	6	6.5	7	7.5	8	8.5	9	9.5	10	10.5	11	
UK	3	3.5	4	4.5	5	5.5	6	6.5	7	7.5	8	8.5	9	
European	35	36	37	37.5	38	38.5	39	39.5	40	40.5	41	41.5	43	

The grey shaded boxes show the Men's to Women's equivalent sizes for unisex sized footwear. For example, a Men's AUS/UK 5 is equivalent to a Women's AUS/USA 7.

Please Note: Unisex sizes are wider fits for women than women's specific footwear.
